

## Raytheon Australia Aerospace Operational Support Group Support Services (AOSG SS)

The Raytheon Australia Aerospace Operational Support Group maintenance contract was re-established in November 2009 to provide maintenance and manufacturing support for the RAAF continuing on from 10 years of service as Raytheon Australia ARDU (RA-ARDU).

The prime objective of the AOSG SS contract is for the provision of serviceable aircraft and other technical equipment to meet AOSG's task and flying requirements.

Specifically, the AOSG SS team maintains Australian Defence Force in-service fixed and rotary wing aircraft.

The AOSG fleet aircraft include three Pilatus PC9s, two F/A-18 Hornets and one SA70-B Blackhawk helicopter. Other ADF Aircraft types are also supported as allotted Aircraft as required.

The AOSG SS team provides configuration management of non-standard modifications (NSMs), the manufacture of mechanical and electrical components which are critical to the conduct of Test and Evaluation projects.

### Quality Organisation

The Raytheon Australia ARDU facility is an ADF Authorised Maintenance Organisation (AMO) and is also ISO9001: 2000 accredited.

This accreditation provides the framework for management of the facility.

### Capability

- Aircraft configuration management, including Non-Standard Aircraft Modification;
- Aircraft maintenance scheduling and control;
- Operational Flight line services;
- Routine aircraft maintenance;
- Unscheduled aircraft maintenance;

- Modification and special technical instruction incorporation;
- Armament support;
- Off aircraft maintenance;
- Gaseous and liquid dry breathing oxygen maintenance;
- Aircraft and aircrew life support equipment maintenance;
- Electrical and Mechanical Component manufacture including prototype production;
- Logistic Support;
- Ground Maintenance Equipment servicing and repair; and
- Deployment maintenance support.

### Notable Achievements

In 2005 Raytheon Australia ARDU Team were presented by DGTA 'The Most Efficient and Effective Quality Management System' Award positioning the Quality Management System amongst the best in the ADF environment.
