

Supporting Maths and Science Education

Inspiring Australia's next generation of engineers

Proudly Australia's leading mission systems integrator, Raytheon is partnered with Questacon to present Imagination Factory. By inspiring the next generation of engineers in maths and science, Raytheon is supporting Australian education and developing leaders for tomorrow.

About the Imagination Factory

In August 2007 Raytheon demonstrated its global commitment to maths and science education with a A\$1 million partnership with Questacon, Australia's National Science and Technology Centre.

The result of the partnership is the Questacon Imagination Factory, an exhibition which tells the systems integration story and shows how things work together to do inventive

things. This partnership is the largest community initiative undertaken by Raytheon outside the United States.

Raytheon's Commitment

Raytheon has a proud history of philanthropy and is keen to support the community in which it operates.

As a technology and engineering company Raytheon is intimately aware of the need to motivate young people to continue their studies in maths and science.

The Imagination Factory exhibition will be located at the Queensland Museum from the 19th December 2009 to the 10th December 2010.
