

Supporting Maths and Science Education

Inspiring the next generation of engineers
at Aberfoyle Park High School

Raytheon Australia is dedicated to inspiring the next generation of scientists and engineers. The company is partnered with Australia's National Science and Technology Centre and a prominent public school in Adelaide to ignite a passion for maths and science amongst school students.

Aberfoyle Park High School

In November 2008, Raytheon Australia announced the launch of a partnership between the company and the Aberfoyle Park High School in Adelaide. Aberfoyle Park has a long history as one of the significant science and mathematics schools in South Australia. It is the official Department of Education and Children Services school for gifted children in the southern metropolitan area of Adelaide.

The initiative will grant the school funds over three years to help provide the gifted students of the school's 'Ignite' program with the access to the computers they need to ignite their passion for maths and science.

In addition to providing direct financial support, the

partnership will involve Raytheon Australia employees acting as mentors to encourage students to pursue technology rich careers. By showing students the possibilities that maths and science can present the company hopes to make a genuine contribution to their future.

Raytheon's Commitment

Raytheon has a proud history of philanthropy and is dedicated to supporting the communities in which it operates.

As a technology and engineering company Raytheon is intimately aware of the need to motivate young people to continue their studies in maths and science.

By inspiring the next generation of engineers in maths and

science, Raytheon is supporting the skills of the future and developing leaders for tomorrow.
