

Biography

Andrew Pyke is General Manager of Security Solutions, based in Canberra, ACT. Andrew has a background as a communications engineer, program manager and in a variety of business leadership roles in both Defence and commercial communications sectors.

In 2010, Andrew completed a secondment to the Australian Department of Defence working on Defence's Strategic Reform Program. In 2009, Andrew completed an innovative new course in Complex Project Management, at Queensland University of Technology.

Andrew holds a Masters of Business Administration in Technology Management from Deakin University, an Advanced Diploma in Project Management, a Diploma in the Company Directors Course run by the Australian Institute of Company Directors, a Diploma of Administration, and is a graduate of the Royal Melbourne Institute of Technology with a Bachelor of Engineering (Communications), and a graduate of the Royal Australian Air Force College.

Before performing his current role at Raytheon, Andrew held roles including Program Manager of a major air traffic control program and General Manager of Network Centric Systems.

Prior to joining Raytheon Australia, Andrew was employed by Cable & Wireless Optus (now Singtel Optus) in a number of national roles, specialising in management of eSolutions and program management of major telecommunications programs for Corporate and Government customers.

Born in Australia, Andrew spent the early part of his career serving with the Royal Australian Air Force as an Engineering Officer, concluding in major capital projects in the then Defence Acquisition Organisation. He was Engineering Manager for the Wedgetail Airborne Early Warning & Control Project; Project Engineer for the Jindalee Project; and Manager of IT and telecommunications services, at RAAF Fairbairn and RAAF Richmond.
